With the growing demand for meeting rooms, an integrated booking system becomes crucial for optimal facility utilization. Our **meeting room display solution** offers real-time availability status, allowing for the booking of meeting rooms while scheduling through O365 Teams/Calendar. This prevents scheduling conflicts and reduces the likelihood of rooms being occupied when new meetings are planned, ensuring efficient management and smooth transitions between meetings.

Our solution, built on standard Android tablets and integrated with Microsoft O365, helps you utilize your conference rooms effectively. The audio notification alerts occupants about the next scheduled meeting, ensuring a smooth transition so participants don't waste time. This is how our **meeting room booking system** keeps your meetings engaging and efficient.

It is a cost effective and a reliable solution integrated with Microsoft O365.

Features Of Our Meeting Room Booking Solution

Calendar Screen

To book a meeting room, start by clicking on Calendar/New Meeting. Fill in the meeting details, then click on the 'Add Location' field to view available conference rooms. Choose your desired room from the list and proceed with the booking.

Audio Alert About The Next Meeting

The meeting room display system includes an audio alert feature that notifies users of upcoming meetings. As the next meeting approaches, a sound alert will play to remind attendees, ensuring timely transitions and efficient use of the meeting space.

Room Status LED Colors

The meeting room display device has three status LED colors for users to recognize the room availability.

- ✓ Green- The room is available
- ✓ Orange- The room is going to be occupied in next 10 Minutes
- ✓ Red- Room is currently occupied

Main Screen

From the main screen (Tablet device) users can see details about the meeting room and can view/perform the following actions:

- ✓ Meeting Details
- ✓ Event View
- ✓ Weekly Display
- ✓ Day Display

Administrator Panel

The administrator panel in Net Access's conference and board room display solution provides centralized control for managing and configuring meeting room displays. Through this panel, administrators can set up and adjust room availability, manage user permissions, configure booking limits, customize display settings, and monitor room usage. It ensures seamless management of meeting room resources and efficient scheduling.

Advanced Booking

Net Access's conference room display solutions support advanced booking features, enabling users to reserve meeting rooms well in advance. This feature helps with long-term planning and resource allocation, allowing teams to secure rooms for future meetings and events, and ensuring optimal utilization of meeting spaces.

Limit Event Duration

Our **board room display solutions** allow you to set limits on event duration to optimize room usage. Administrators can configure maximum booking times to prevent overrun, ensuring that meeting rooms are available for subsequent bookings and helping to manage the schedule efficiently.

Priority For Senior Management

Automatic Approval

Net Access's **meeting room display solutions** offer an automatic approval feature that streamlines the booking process. When enabled, meeting room requests are automatically approved based on predefined criteria, such as availability and user permissions, reducing the need for manual intervention and ensuring quick and efficient scheduling.

In our **meeting room display solutions**, senior management has priority features designed to enhance their experience. This includes reserved access to premium meeting rooms, priority booking status, and customizable alerts for upcoming meetings. These features ensure that senior management can seamlessly access and manage their meeting spaces without delays or conflicts.

Benefits Of Our Conference Room Booking System
